About me

Motivated and adaptable professional with a strong interest in technology, customer engagement, and sales support. Skilled at using digital tools and technical knowledge to assist teams, streamline workflows, and enhance customer experiences. With hands-on experience in personal software development projects and a foundation in data analysis, I combine problem-solving abilities with clear communication skills to support business goals. I am eager to contribute my technical expertise and learning mindset to drive results in a sales-support role.

Experience

Technical Projects (Self-Learning & Fun Projects) | Ongoing

- Built small-scale applications using JavaScript, TypeScript, and MERN stack for personal learning
- Experimented with data analysis techniques to derive insights from sample datasets.
- Designed simple, functional user interfaces for project prototypes.

Technical Skills

- Programming & Development: JavaScript, TypeScript, MERN Stack (MongoDB, Express, React, Node.js)
- Data & Analytics: Basic Data Analysis, Data Visualization (Excel, Google Sheets)
- Sales Support Tools: CRM Software (basic), Presentation Tools (PowerPoint, Google Slides), Email Communication
- General: Problem-Solving, Critical Thinking, Meeting Deadlines
